Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-4 and 6-9 are drawn to a DNA sequence and vector, classified in class 435, subclasses 6 and 320.1.

II. Claims 5 and 9 are drawn to a plant, classified in class 800, subclass 295+.

2. The inventions are distinct, each from the other because of the following reasons:

The products of Inventions I-II are patentably distinct having different functions, structure and modes of operation. For example, the DNA can be used to make protein or in a hybridization assay. Whereas, the plant is a biological system that contains the DNA.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1653

Applicant is advised that the response to this election requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
